**DETAILED ACTION*****Election/Restrictions***

Applicant's election with traverse of Group I, Claims 1-10 and 12-20, in the reply filed on December 18, 2004 is acknowledged. The traversal is on the grounds that the Examiner has not shown that there would be a serious burden if restriction were not required. This is not found persuasive because the instantly claimed inventions of Groups I and II are directed to two different compositions comprising different ingredients. Thus, the two inventions above are independent and distinct, each from the other. Further, a reference that would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application.

The requirement is still deemed proper and is therefore made FINAL.

**Claims 1-10 and 12-20 are under examination.**

In further view of the claims, an election of species is deemed necessary, as set forth below.

This application contains claims directed to the following patentably distinct species of the claimed invention: the distinct ingredients of Claim 1, lines 4-6.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 7-10 and 17-20 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
